

DATA SHEET

PC Cabinet

86-D2999 with PC and printer

General description

Ideal for housing PC and printer. It is a purpose built accessory for use in many laboratory applications, where a PC is required in a testing environment.

The PC cabinet is designed to provide PC system protection from airborne contamination such as cement and dust. Filtration is achieved by two vented filters in the cabinet. The monitor can be fit on top of the cabinet and three extractable shelves holds keyboard, printer and mouse.

-Dimensions (lxdxh): 500x550x915 mm

-Weight approx.: 55 kg
