

DATA SHEET

J-Ring Apparatus

54-C0147/C

General description

Used for determining the passing ability (measured by the blocking step), the flow spread and t_{500} flow time of the self compacting concrete as the concrete flows through the J-Ring. The apparatus consists of a stainless steel crown with 16 bars 18 mm dia.

- Weight approx.: 10 kg

Standards

- EN 12350-12

54-C0147/C with 54-C0140/20 and 54-C0149/D

Products

54-C0147/C

J-ring apparatus for self compacting concrete to EN 12350-12 with 16 bars 18mm. dia. (narrow gap apparatus)
