Concrete mixers

Pan type mixer, 55-C0199/9A supplied with 2 wheels as standard

General description

Pan type models have been selected for laboratory use, to prepare concrete specimens and samples. They assure the best uniformity and efficient mixing. 55-C0199/9A model is supplied complete with additional interchangeable mixing paddle, particularly suitable for low slump concrete, wheels and drawbar.

55-C0199/11 and 55-C0199/20 models can be completed with optional wheels and drawbar. See accessories.

The drum type model 55-C0196/2 is more suitable for field use to prepare low-medium strength specimens.
