Cyclic and Permanent Deformation Compression Test for UTM Machines

Cyclic and Permanent Deformation Compression Test for UTM Machines 79-PV70180

General description

To perform Permanent Deformation test.

Main features

- Precision engineered, designed to meet the requirements of a range of testing standards.
- Easy to set-up and versatile in the use
- Integrated LVDT holders
- Constructed using stainless and nitrite hardened steel

Standards

- AS 2891.12.1
- BS 598:111
- EN 12697-25 Method A

Specifications

Size (h x dia.): 265 x 215 mm
Weight: 12 kg

Products

79-PV70180

DATA SHEET

Creep testing jig base platen for 100 and 150 mm dia. samples
