

## DATA SHEET

# Overlay Test for UTM, AsphaltQube, AMPT Pro and AMPTQube

Overlay Test for UTM, AST Pro, AsphaltQube, AMPT Pro and DynaQube 79-PV70680

## General description

To perform Overlay test.

## Main features

- Increases the functionality of UTM systems, AMPT Pro, AMPTQube and AsphaltQube
- Advanced design for high stiffness and extremely low compliance
- High precision linear guides to ensure perfect axial loading alignment and no lateral rotation
- IPC Global's UTS software allows quick and easy set-up and running of tests
- Overlay test investigates properties required for predicting both crack propagation and crack initiation
- Available with on-jig and on-specimen transducers
- Specimen preparation kit allows for quick and easy gluing and set-up
- Overlay Test Specimen Preparation Kit built-in gluing plates, straight edge and sample templates, accurate sample cutting, easy alignment and gluing onto the test platens

## Standards

- Tex-248-F
- ASTM WK26816

## Specifications

### Weight

Overlay test kit: 12 kg

Specimen preparation kit: 8 kg

Specimen platen: 1 kg

## DATA SHEET

---

### Products

**79-PV70680**

Overlay Test Jig

### Accessories and consumables

**79-PV70681**

Overlay Testing specimen Plate (one piece)

**79-PV70682**

Overlay Specimen Preparation Kit - Triple SpecimenGlue Jig

**79-PV70685**

Overlay Test Single Glue Jig Spacer Bar 4.2mm
