

DATA SHEET

Water in Bitumen Emulsions Test Set

81-B0155/B

General description

Used for determining the water content of bituminous emulsions by distillation with a water immiscible, volatile solvent.
Comprising:

- Glass still 25 ml
 - Glass receiver
 - Glass condenser
 - Electric heater with thermoregulator
-
- Power: 250 W
 - Weight approx.: 4 kg

Standards

- AASHTO T48
- ASTM D244
- EN 12847
