

## DATA SHEET

# Infrared Non-Contact Thermometer

Infrared non-contact thermometer

## General description

This stick type infrared thermometer measures surface temperatures without touching the object being measured. The closer the instrument is to the object being measured, the smaller the spot size become. This can be as small as 5 mm at a distance of 65 mm.

## Specifications

Measuring range: -10 to 300°C

Resolution: 1°C

Accuracy: ±2°C / 2%

Display: 20 mm hi-contrast LCD display

Max value: retained for 15 seconds

Battery type: 9 V battery

Dimensions: 143x80x38 mm

Weight approx.: 320 g

Note: A traceable ISO 9000 certificate of calibration is available on request.
