RT-MB-023 – Emulsion lab colloid mill

Description:

RT-MB-023 is a compact colloidal mill for bitumen emulsion production in laboratory. Really useful for emulsion mix design analysis in terms of bitumen, water and additives quantity. The emulsion lab colloid mill designed to replicate in laboratory the production of bitumen emulsion done in the plant.

Main features:

- Speed control
- High speed – up to 8.000 rpm
- One hopper for feeding of water phase and bitumen
- High product quality similar to industrial production
- Easy and safe operation.

Weight (approx.) – 15 kg

Power supply – 220-230 V, 50 Hz, 1 Ph
